NIKHIL TANWAR

Koblenz, Germany
+49 151 10045633 ⋄ workidnikhil@gmail.com

EDUCATION

MSc Web & Data Science Expected Oct 2027
Major in Machine Learning, Big Data Technologies, Web Development,
Data Visualization, Statistical Modeling
Universität Koblenz, Germany

BTech Computer Science 2020 – 2024
Major in Object-Oriented Programming, cybersecurity
Bennett University, India

TECHNICAL SKILLS

Programming	Python, linux, scripting
Data Analysis	SQL,Regex, Python (Pandas, Seaborn, Matplotlib), Power BI, NumPy
Database Management	RDBMS, NoSQL
Tools & Platforms	Databricks, Git, GitHub, Jupyter Notebook, VS Code, Excel, LLM
Machine Learning Frameworks	TensorFlow, PyTorch, Scikit-learn, XGBoost
Technical Skills	Data Modelling, Data Visualization
Soft Skills	Critical Thinking, Problem-Solving, Communication, Team Collaboration

PROJECTS

Germany Public Transport Delay Analytics

- Delay Pattern Analysis: Processed 100K+ German public transport trip records (GTFS schedule + delay data), revealing peak delay hours, high-risk routes, and weekday vs weekend delay behavior.
- Model Development: Engineered time, route, and weather-based features and built Logistic Regression, Random Forest, and XGBoost classification models to predict delay probability (>5 mins), achieving an F1-score of 0.87.
- Operational Insights: Discovered key delay drivers such as rush hours, rainfall, and station congestion, and built a Streamlit dashboard for delay monitoring and real-time delay prediction.

Airbnb Berlin Price Analytics

- Geospatial Pricing Analysis: Independently processed 20K+ Berlin Airbnb listings from InsideAirbnb dataset, uncovering neighborhood pricing trends, room-type demand patterns, and amenity-driven price differences.
- Model Development: Built and optimized Linear Regression, Ridge, Random Forest, and XGBoost regression models to predict nightly prices, reducing MAE from €35 baseline to €18 with XGBoost.
- Strategic Outcomes: Identified top price-driving factors (location clusters, review scores, superhost status, amenities) and developed an interactive dashboard to assist hosts in data-driven pricing decisions.

E-commerce Sales Forecasting using Kaggle's Dataset

- Time Series Analysis: Independently processed 500K+ transactions from Kaggle, uncovering sales trends and patterns over time.
- Model Development: Built and optimized Linear Regression, Decision Trees, and XGBoost models, achieving an impressive R-squared of 0.89.
- Strategic Outcomes: Derived actionable strategies from the analysis, poised to enhance e-commerce sales and marketing initiatives.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- NVIDIA — Fundamentals of Deep Learning
- Databricks - Data Warehousing

LANGUAGES

English	Full Professional Proficiency
German	intermediate(B1)
